Our Key Figures

A continuous success story

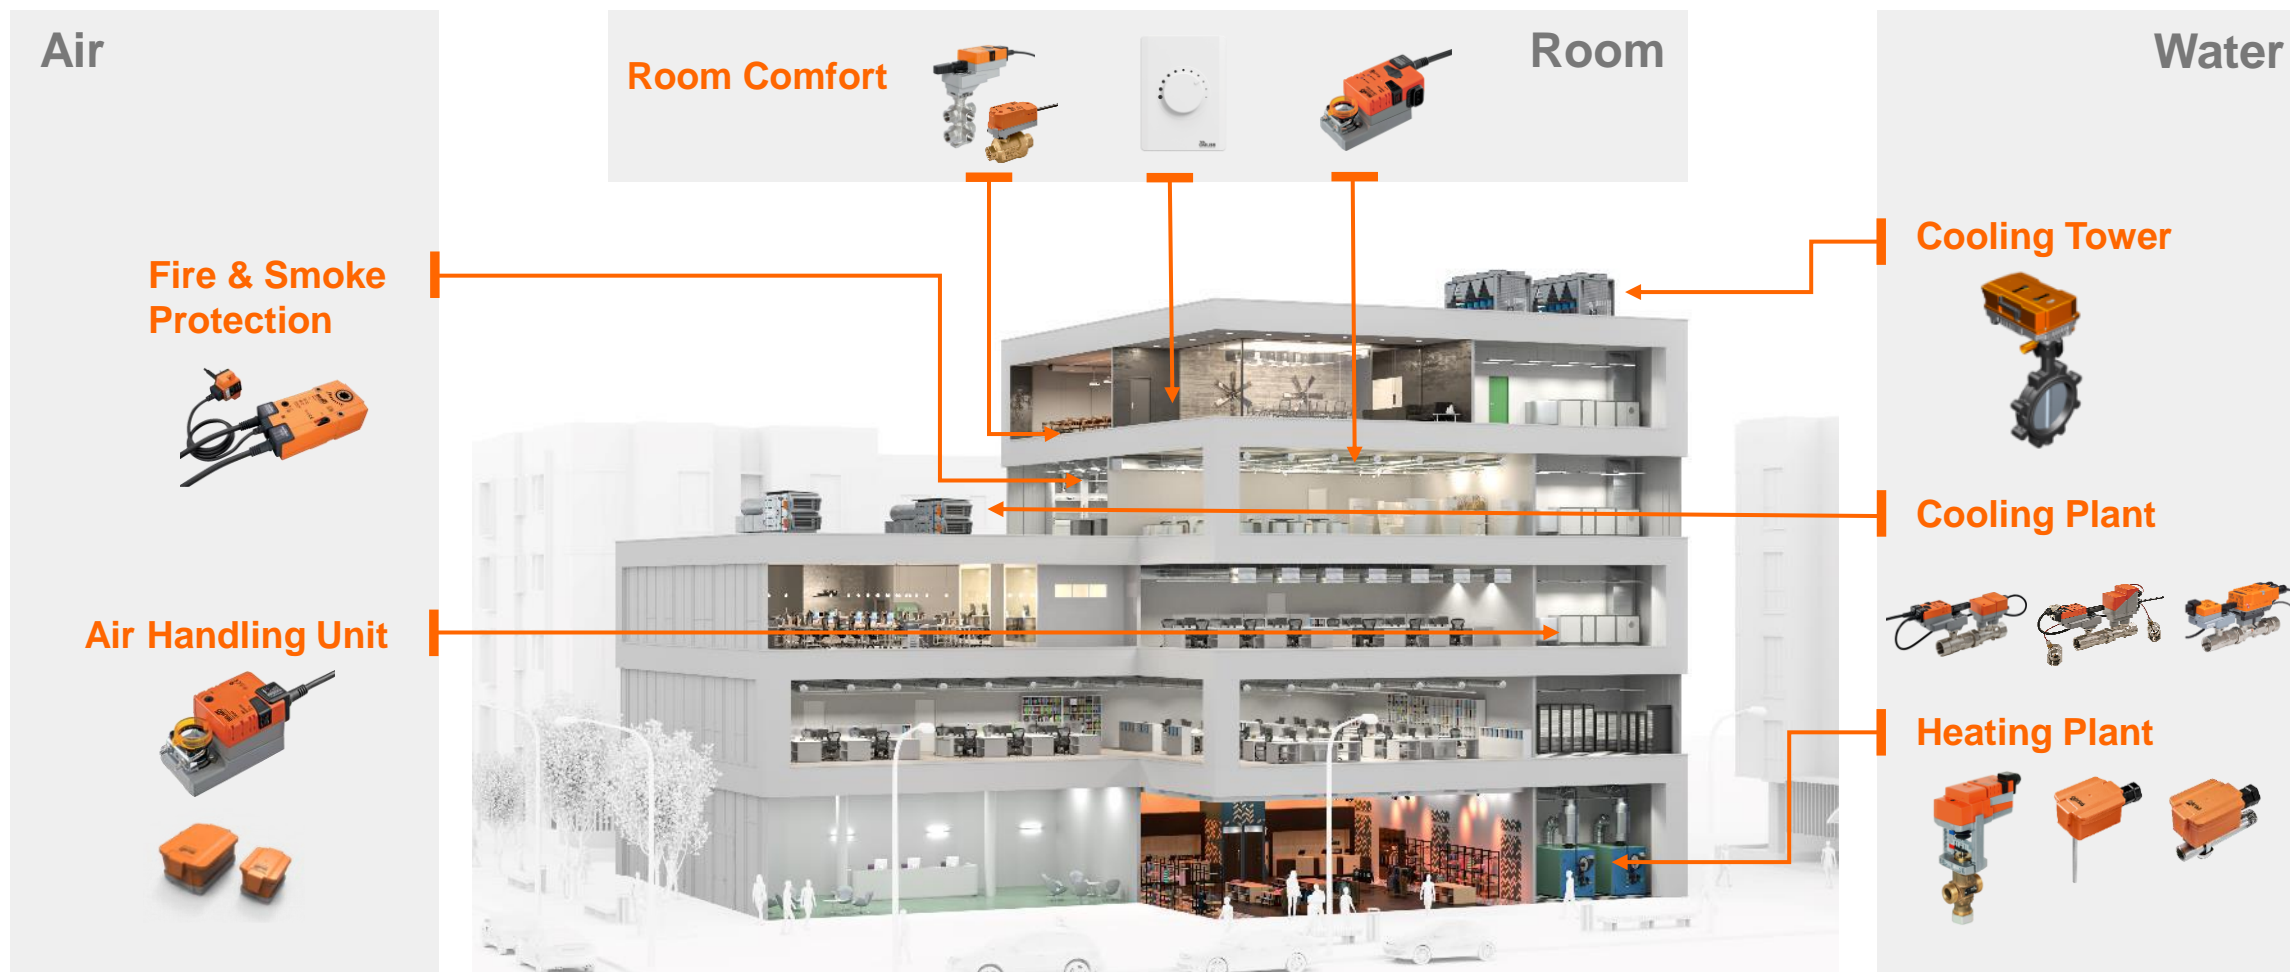

Net Sales 2003-2022

In CHF million

Applications

Heating, ventilation and air conditioning in buildings

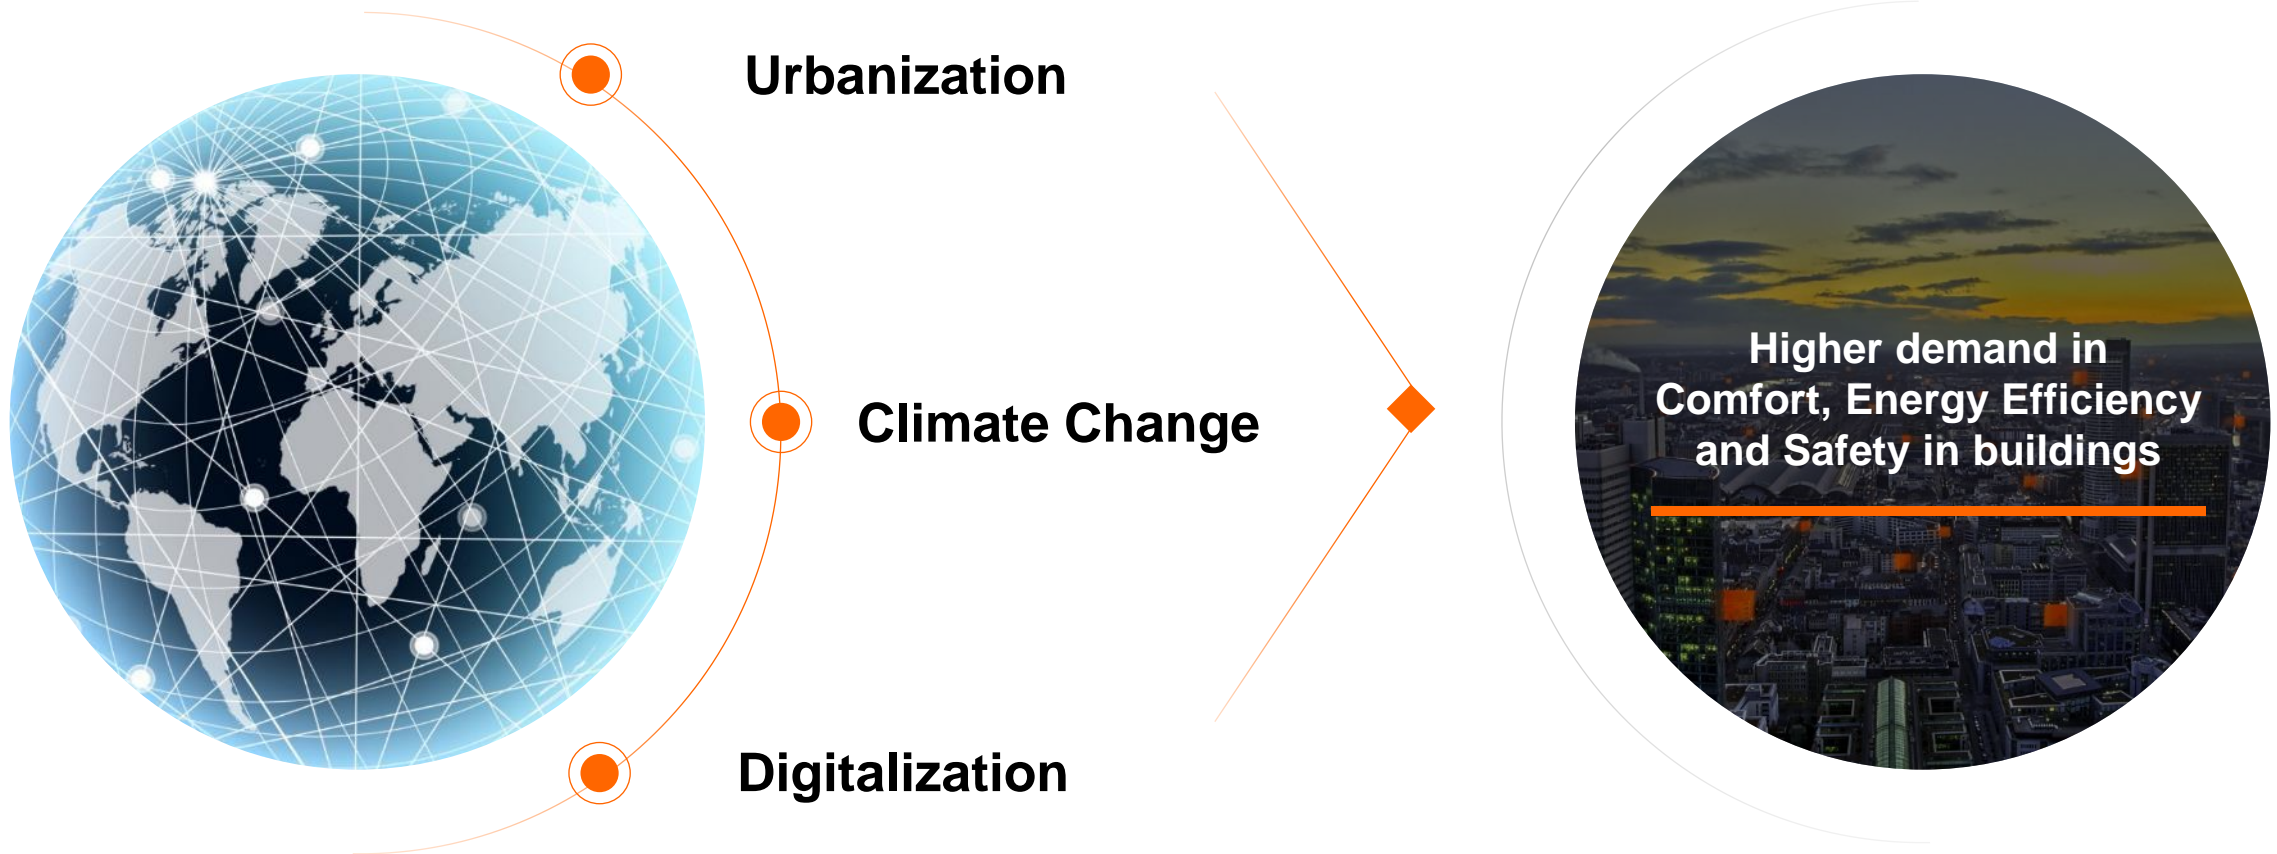

End-Customer Segments

Belimo products in every third commercial building

Megatrends

Driving higher demand in comfort, energy efficiency and safety

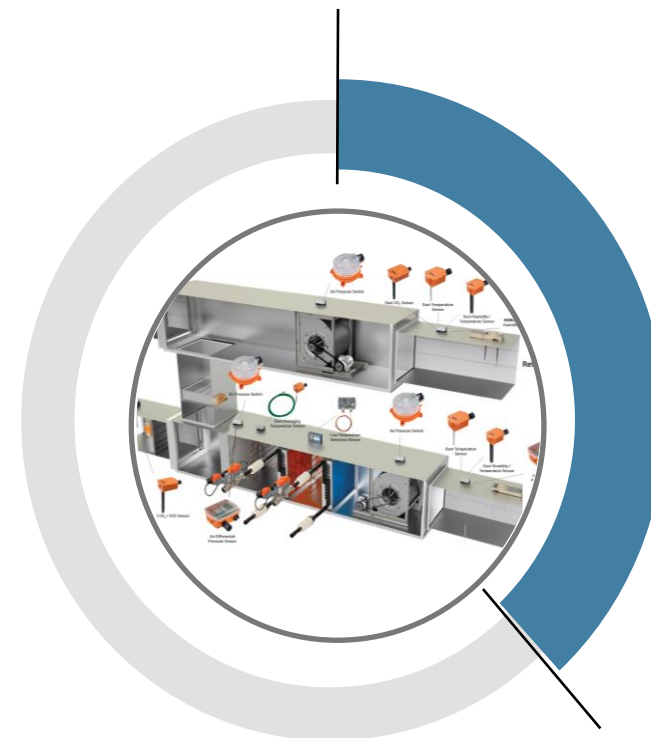

Energy Consumption of Buildings

Building consume 40% of the world's energy

40%
of the worldwide
energy consumed is
related to buildings

40%
of energy used in
buildings comes
from HVAC-systems

Our History

Key milestones on our 48-year long history

2009

Creation of the 6-Way
Characterized Control
Valve (6-Way CCV)

2012

Creation of the Belimo
Energy Valve™

2015

Introduction of the
ZoneTight product range

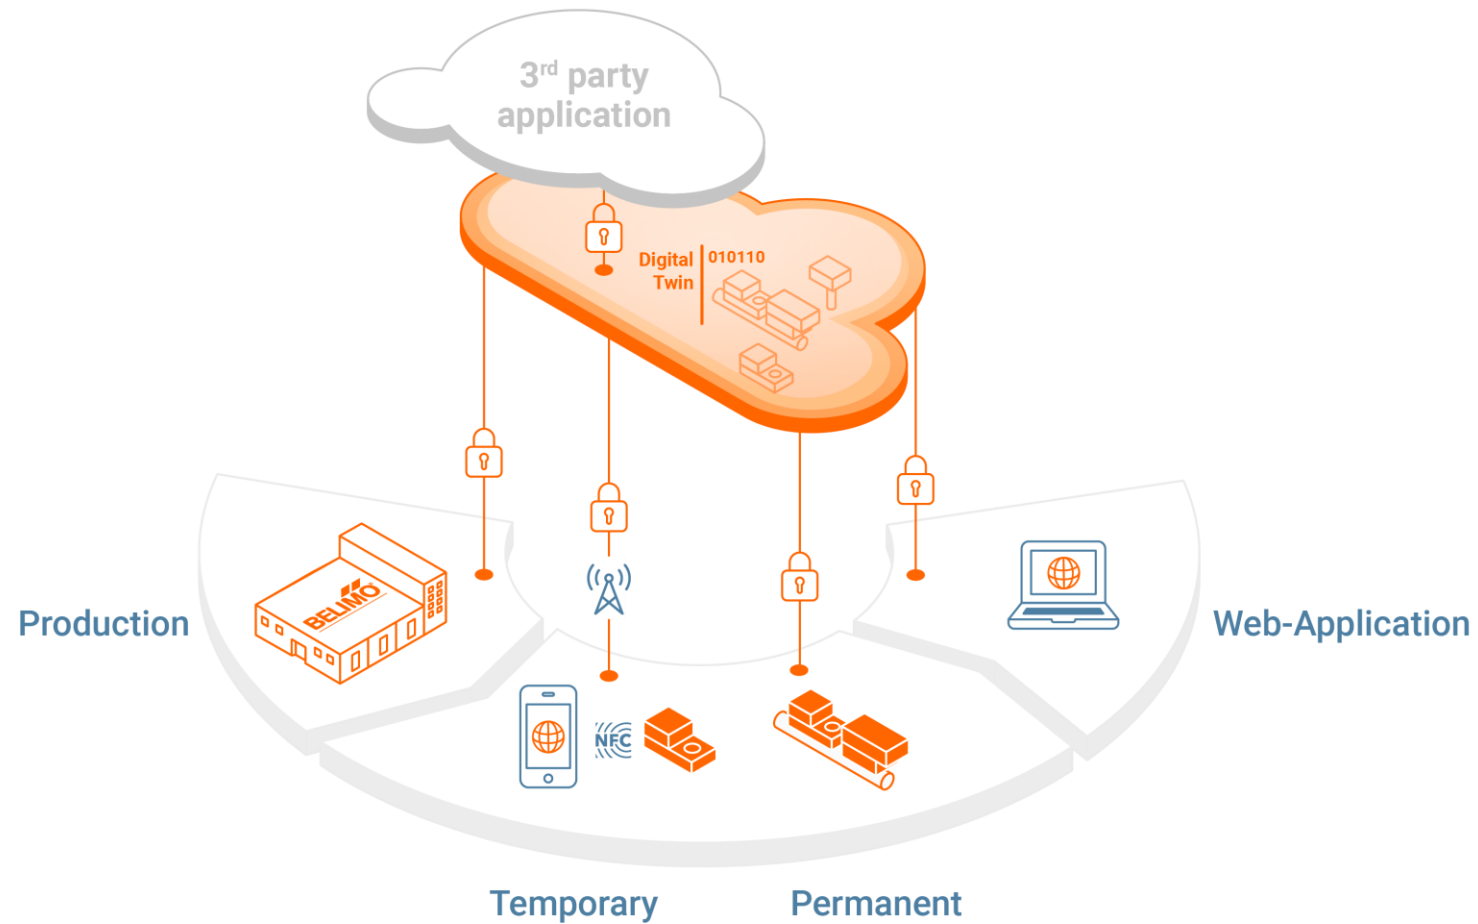

2016

IoT product range of
cloud-enabled products

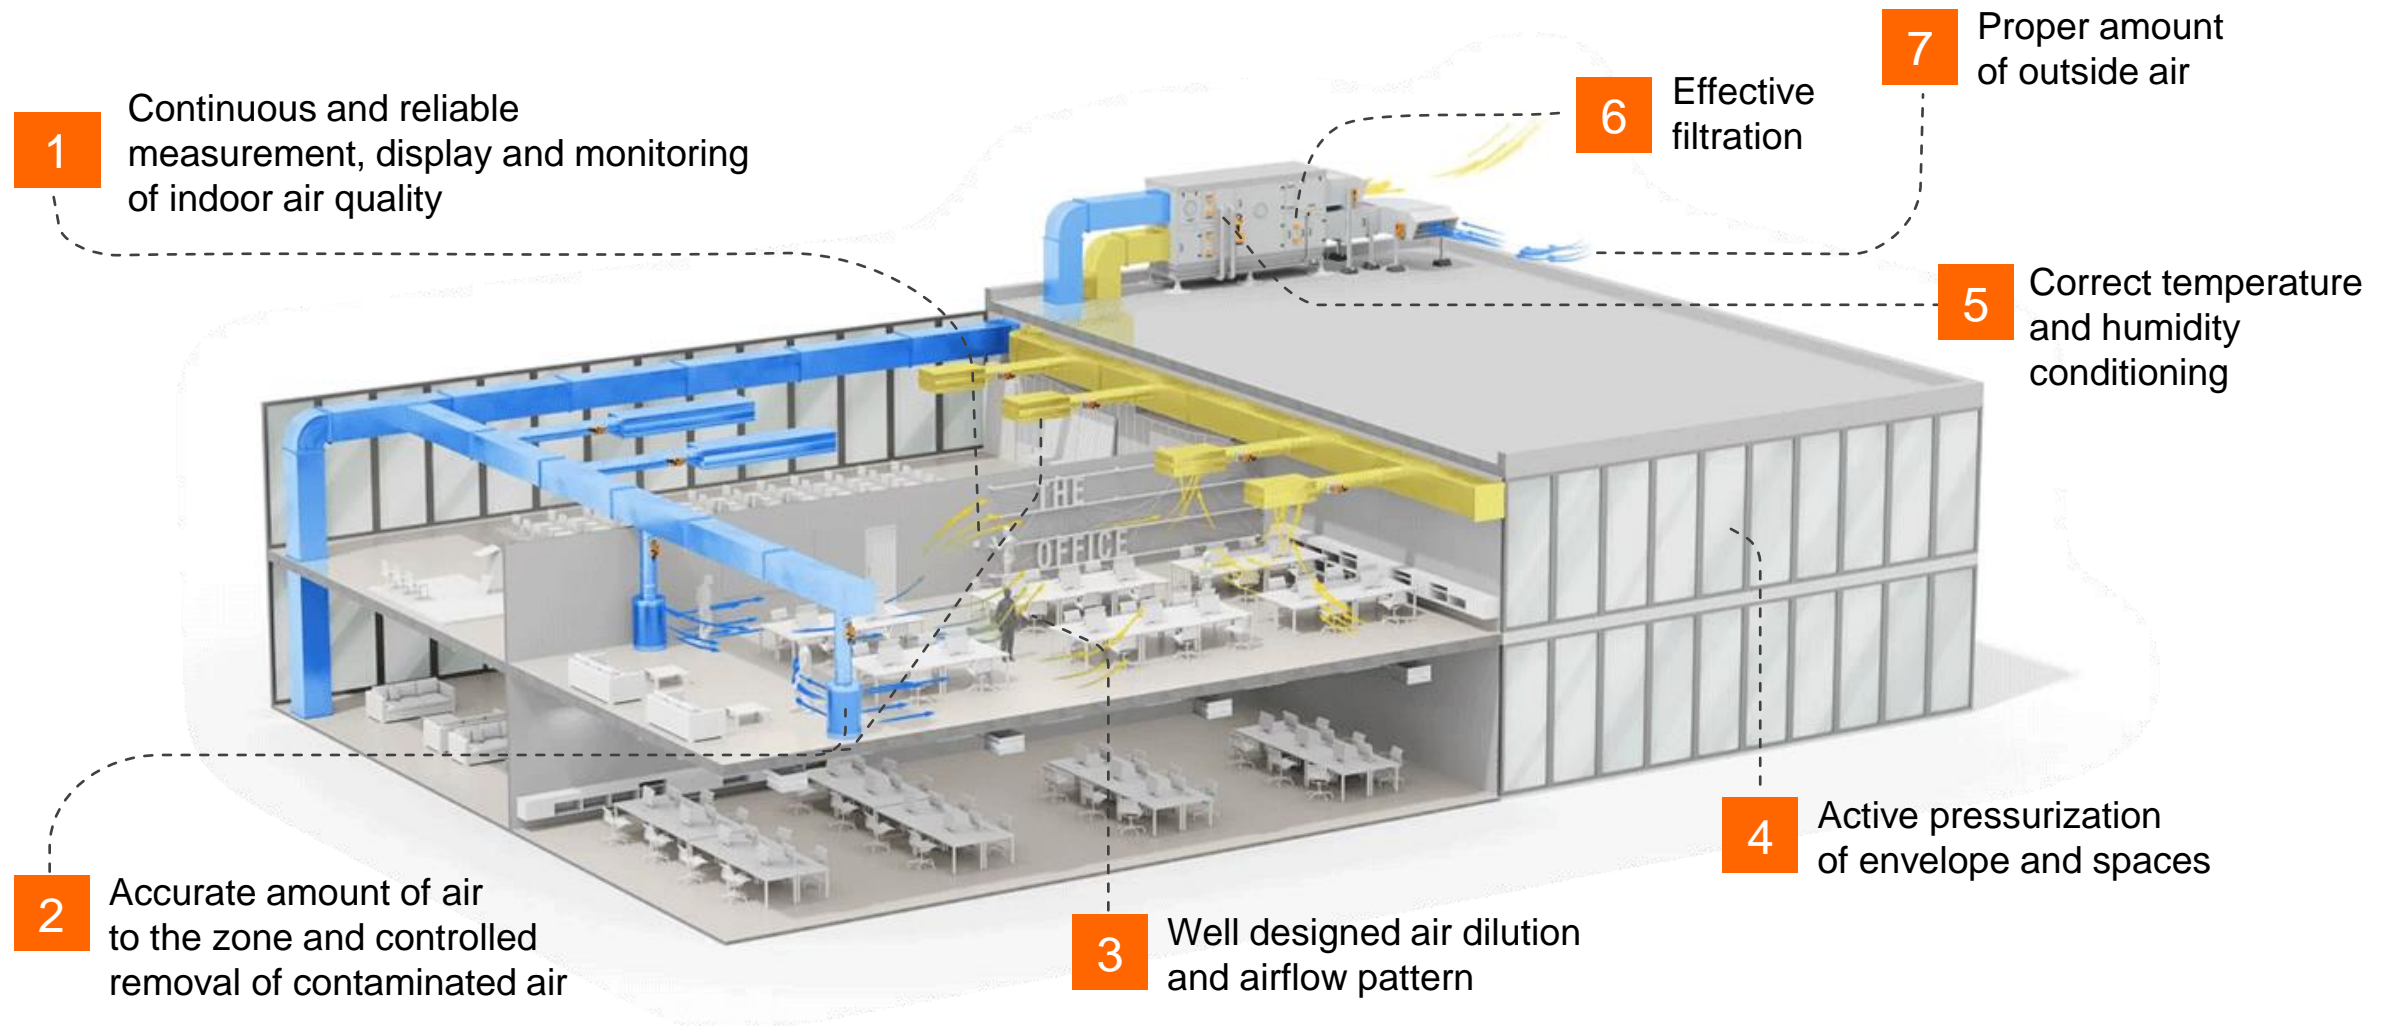

Solution Leadership

Belimo IoT-ready products and the Belimo eco-system

Basic requirements for HVAC systems for healthy indoor air

7 essentials of a healthy building

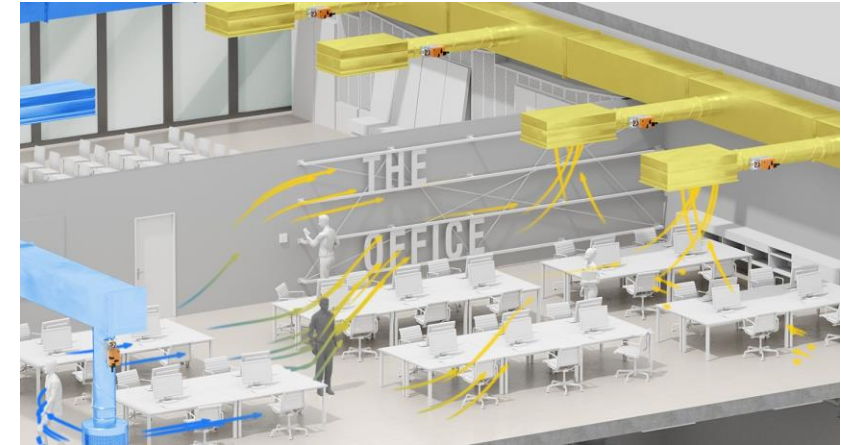

Our contribution to “Safety” – Healthy Indoor Air

For the better health of future generations

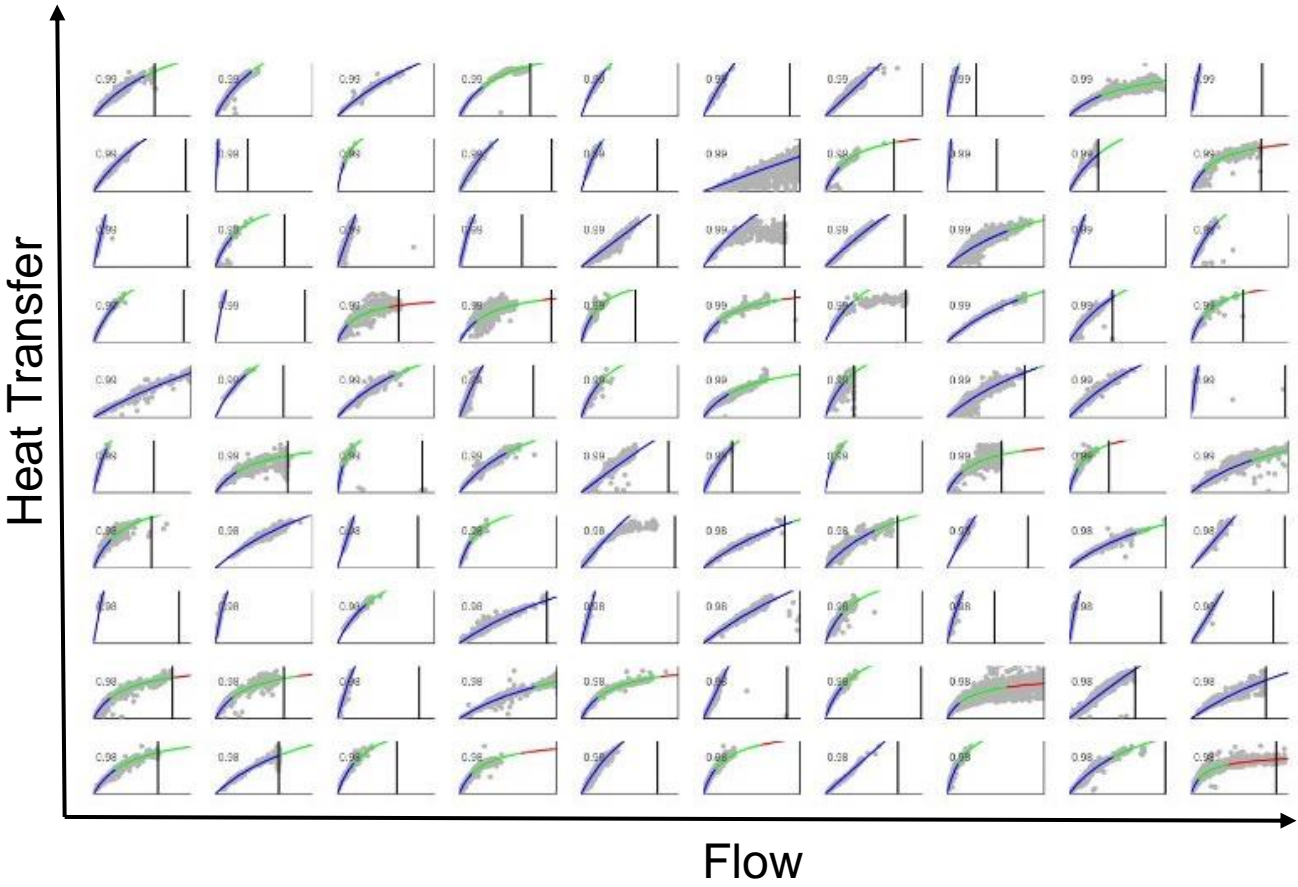

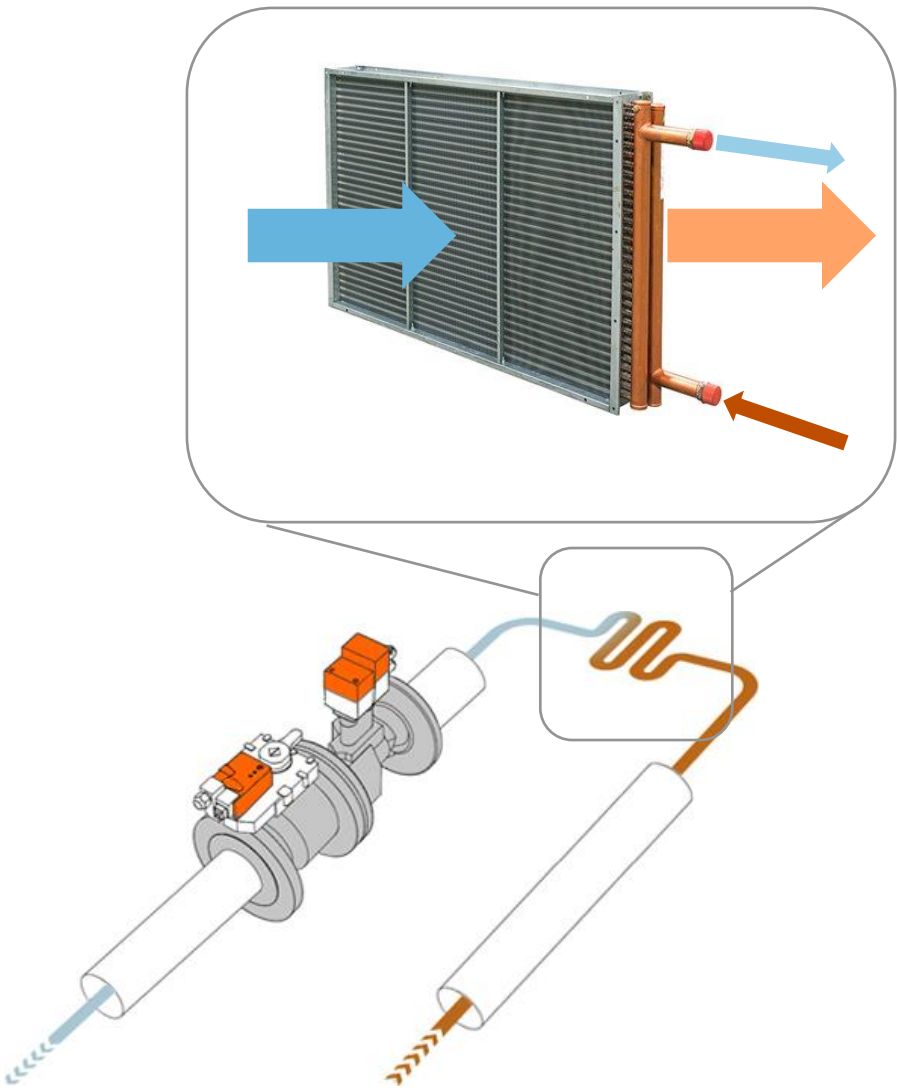

Belimo contributes to healthy indoor air with:

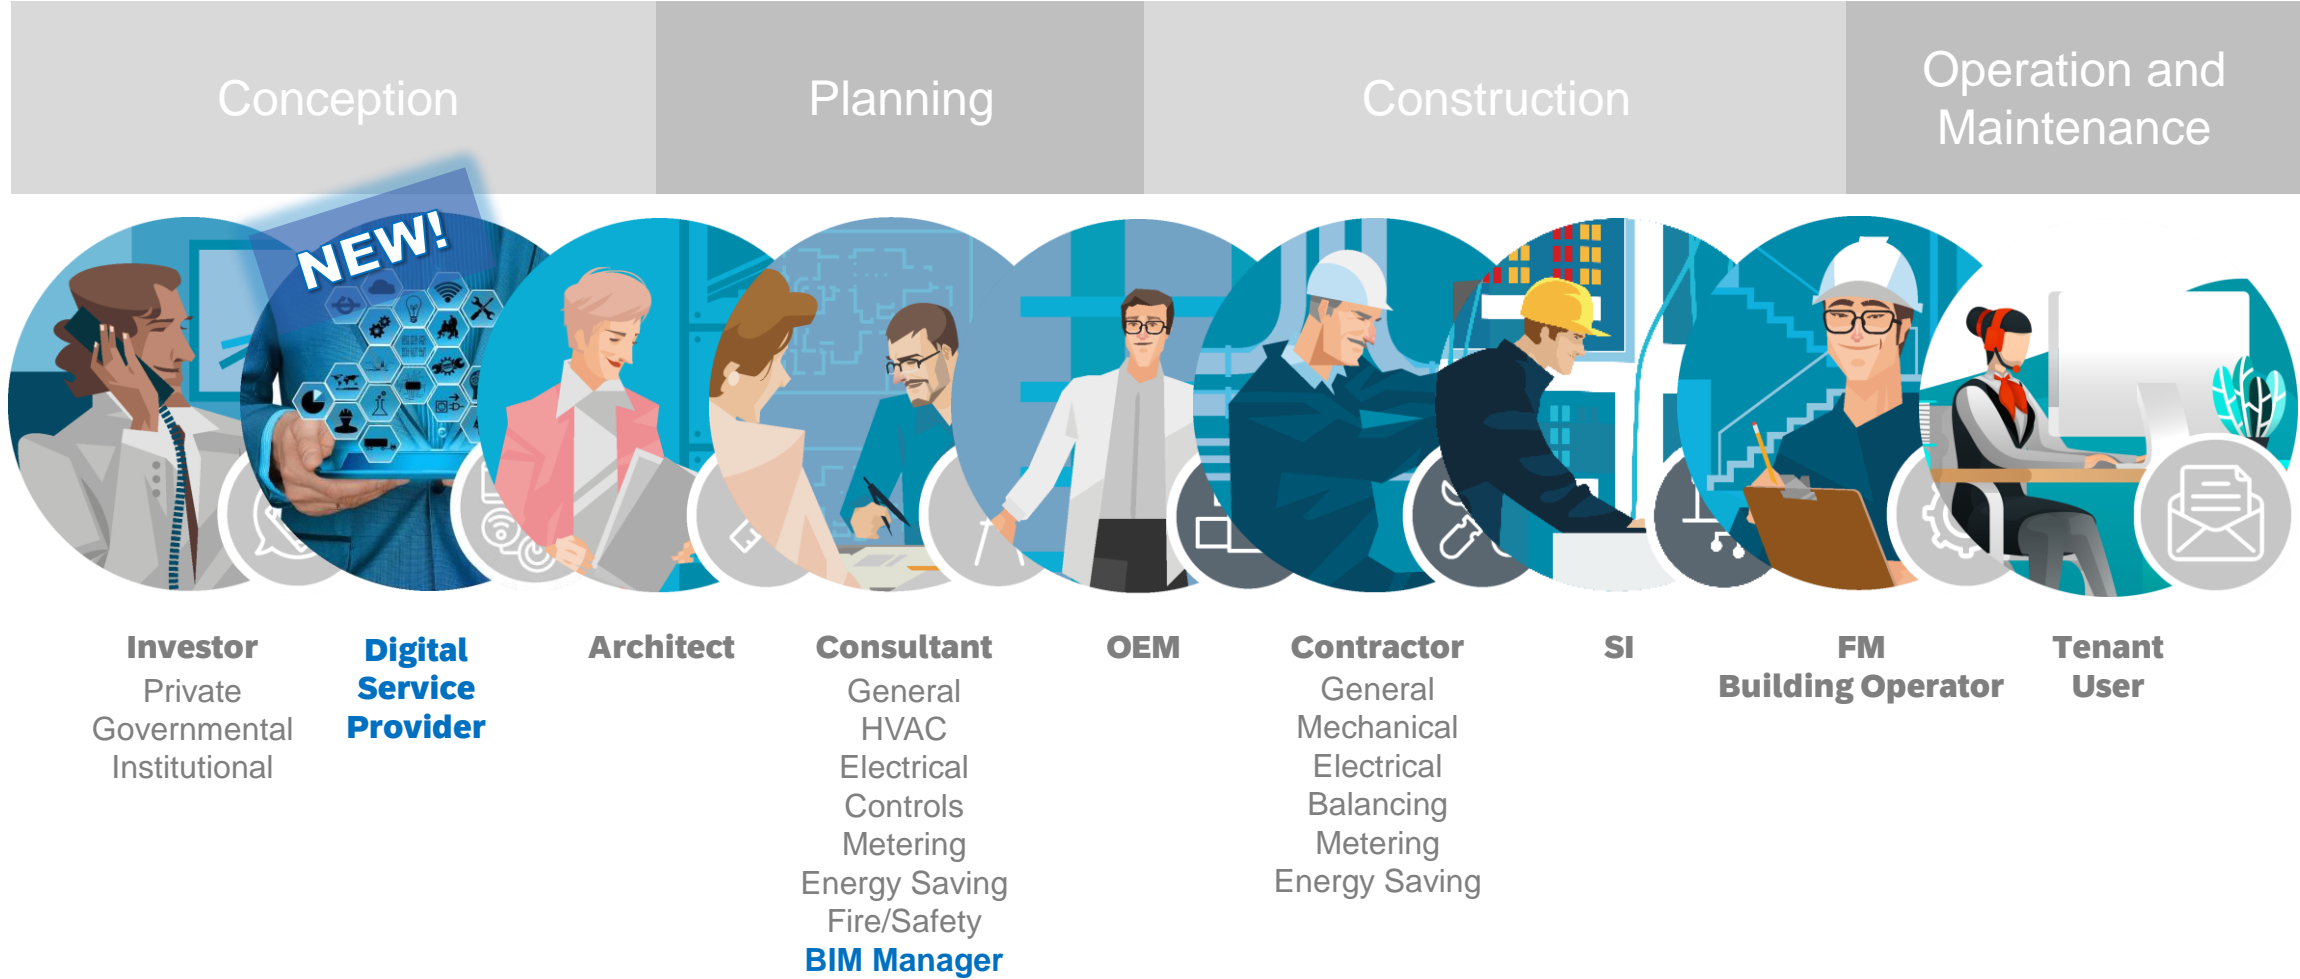

- Accurate and reliable room and duct sensors
- VAV solutions for demand-controlled ventilation
- Fast-acting actuators and tightly closing valves
- Belimo Energy Valve™ for precise and stable control, energy measurement and monitoring
- Seamless BMS and cloud-platform integration
